REVIEW 1

ACKNOWLEDGE

Our group would like to devote this chapter to express our sincere appreciation to all those who offered us valuable assistance during in carrying out this Project.

Firstly, we owe a debt of gratitude to our dedicated instructor, MS. Le Mong Thuy, whose suggestions and encouragement helped us to overcome not only technological challenges but also psychological tension. Without him, our work could not complete successfully.

Secondly, we highly appreciate the Project Team at the Head Office, which has provided us an excellent opportunity to apply what we learned into practice. We are certain that the experiences we gained from this project will facilitate our future career greatly.

Thirdly, we would also like to express my gratitude to all the staff members of my center for not only providing me with the opportunity to work with them on this project, but also for their support and encouragement throughout the process.

Finally yet importantly, we wish to say a personal thank you to all our dear classmates and team members who are always willing to support us openly and enthusiastically.

INTRODUCTION

We are in an age when information technology makes buying and selling easier than ever. People can order an expensive phone for an everyday kitchen appliance and everything is done electronically and interacting in real time. Liquor Stores are also not out of this cycle. So we are developing a website called Liquor Stores to provide easy access to buying liquor and distilled spirit online.

Liquor Stores is for an organization who wants to develop an online store where the visitor can be a person who does not have much time to go to the wine store or person has shopping online habit or just simply they stay too far from standalone store. It will provide its user the following features.

For Liquor Store's customer base:

- Unregistered visitor who can register member account.
- Registered visitor can login and manage their account.
- Visitors can search any products such as whiskey, gin, tequila, etc.
- Visitors can search products by price.
- Visitors can see products' introduction before buying.

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

- Visitors can buy products after adding products to cart.
- Visitors can view cart history.
- Visitors can check out.
- Visitors can review order history and make change.
- Visitors can interact with website by giving question, feedback on contact us function.

Menu

PROBLEM DEFINITION

After analyzing the project specifications of Liquor Stores, to fulfil customer's requirements properly, we came to conclusion that in order to achieve the best result, we should deal with following queries:

FROM THE VIEW POINT OF VISITORS

- A homepage will show the main products, suitable logo, display the logo on all the pages in the site.
- A navigation header and footer that will include all the functions implemented in the website.
- Visitor can buy products, add product to cart, view cart and check out.
- Registered visitors can login to their profile, view order history and receive email promotion/Coupon.

FROM THE VIEW POINT OF THE ADMINISTRATOR

- A login page will grant access to Liquor Stores admin.
- Admin can view, add, update, delete and manage products.
- Admin can view, add, update, delete, find, lock, and unlock customer account.
- Admin can add, update, delete and manage orders.
- Admin can update, or delete and manage registered user account.
- Admin can manage and send newsletter.
- Admin can register and assign role to staff users.

CUSTOMER'S REQUIREMENTS SPECIFICATIONS (CRS)

CLIENT: LIQUOR STORES

BUSINESS/PROJECT OBJECTIVE:

The project is to design an online website for advertising and selling all types of liquors, for instant: whiskey, gin, tequila, etc.

INPUT TO THE SYSTEM:

Liquor Stores administrators need to provide:

- Information required in order creating account to access to the admin system.
- Products are going to be shown on the website.
- Payment Method and Shipping cost when ordering certain product.
- Information required to create staff account within admin system.

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

Customers Liquor Stores need to provide:

- Personal information to buy products.
- Email information to receive weekly promotion or deal and coupon.

OUTPUT FROM THE SYSTEM:

Liquor Stores administrators will be able to:

- Login/Logout to the admin system.
- Manage (view, add, update, delete, hidden) products, price, promotion.
- Manage (view, add, update, delete, find, lock, unlock) customer account.
- Manage (view, add, update, delete) news.
- Manage (view, add, update) products, order.

Liquor Stores guests will be able to:

- Register customer account.
- Buy products after add information.
- View products that they have chosen.
- View order history.

Liquor Stores customer will be able to:

- Register account.
- Login/Logout to the account.
- Search products they want to buy by name, price.
- Add product to cart and checkout.
- View purchase history.

SCOPE OF WORK

The application should perform the following functions:

LOGIN:

- There are 3 types of account in the application (“admin”). Administrator will login as “admin”. Staff will login as “staff”. “Viewer” will login as “inspector”
- For “admin”: can view the products id, name, add new, update, delete.
- For “admin”: can view the customer id, name, add new, update, delete, lock, unlock.
- For “admin”: can view and manage view.
- For “admin”: can view and manage order.
- For “staff” : can perform the same function as admin but will be restricted to View, Add New, Update info
- For “inspector” : can only have access to admin/dashboard and only

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

ORDERING PRODUCTS:

- When customer choose a product and the selected product will be added to the cart.
- Customer can buy products at shopping cart after pressing the “Checkout” button and fill in the information.

DATABASE:

- The information about products, customers, news, orders will be stored in the database.
- The information from the contact us page.

SEARCH PRODUCTS:

Author		
Use case name	Search product	
Actors	Registered Customer/ New Customer	
Description	Customer can search product	
Requirements	Customer provides search phrase	
Pre-conditions	N/A	
Post-conditions	Success: Show product that matches search phrase	
	Fail: No product is shown	
Basic flow	Actor's actions:	System's responses:
	1. Actor inputs search phrase. 3. Actor clicks product's name in list or view every product that matches search phrase.	2. System shows list of products that match the search phrase.

VIEW PRODUCT DETAIL:

Author		
Use case name	View product	
Actors	Registered Customer/ New Customer	
Description	Customer can view product detail	

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

Requirements	Customer select product to show product's detail	
Pre-conditions	N/A	
Post-conditions	Success: Display product detail matching the selected product Fail: No product is shown	
Basic flow	Actor's actions: 1. Actor select product	
Basic flow	System's responses:	
		2. System shows product's detail matching selected product

CREATE CART:

Author		
Use case name	Create cart	
Actors	Registered customer	
Description	Customer can add product to their cart	
Requirements	Customer must choose at least one product	
Pre-conditions	Customer must log in before adding product	
Post-conditions	Success: Actor add product to cart successfully Fail: Refill information	
Basic flow	Actor's actions: 1. Actor chooses a product and click "Add to cart".	System's responses: 2. System adds selected product to cart by id of this product.

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

Exceptions	Actor's action	System's response
	1. Actor inputs more products than there are in stock.	2. System shows messages: - "Product out of stock".

VIEW CART:

Author		
Use case name	View cart	
Actors	Registered customer	
Description	Customer can view their cart	
Requirements	N/A	
Pre-conditions	Customer must log in before view cart	
Post-conditions	Success: Customer can view their cart	
	Fail: Refill information	
Basic flow	Actor's actions:	System's responses:
	1. Actor click on "Cart" icon.	2. System shows cart and added products.
Alternative flow	1. Actor clicks "x" – Close button- on table 3. Actor change quantity of a product 5. Actor clicks "x" – close button – in the right side of each product.	2. System redirects to current page. 4. System update quantity of this product into cart. 6. System removes this product from cart.

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

CHECKOUT:

Author		
Use case name	Check out and Place order	
Actors	Registered customer	
Description	Customer can order products	
Requirements	Customer must has at least 1 product in cart	
Pre-conditions	Customer must log in before adding product	
Post-conditions	Success: Actor order successfully	
	Fail: Refill information	
Basic flow	Actor's actions:	System's responses:
	1. Actor click "Add to cart" button or "Cart" icon. 3. Actor clicks "Check out with" button. 5. Actor inputs order information then click "Place Order" button. 6. Actor inputs Card owner's name, card number and security code if actor choose payment by credit card. 9. Actor views order's status in Order page.	2. System shows cart and added products. 4. System shows all products in cart with calculated total price and show following controls: - "Customer name" text field. - "Phone" text field. - "Address" text field. - "Province" select box. - "Delivery time frame" select box. - "Payment" table. Systems shows Payment tab type according to type of payment actors choose.

Prepared by: All members	Approved by: Lê Mộng Thúy
Project Group No: 1	Version: 1.0

		7. System validates information. 8. System redirects to Order page and show order's status.
Alternative flow	1. Actor clicks "x"- Close button- on table 3. Actor clicks "X" button on each product. 5. Actors clicks "Home" button.	2. System redirects to cart page. 4. System removes product from cart. 6. System redirect to Home pages.
Exceptions	Actor's action	System's response
	1. Actor inputs more products than there are in stock. 2. Actor left "Billing name" text field blank. 3. Actor left "Address" text field blank. 4. Actor left "Delivery date" blank. 5. Actor left "Delivery time frame" blank. 6. Actor left "Payment" dropdown blank. 7. Actor inputs invalid card information.	8. System shows messages: - "Product out of stock". - "Order name must not be blank". "Address must not be blank". "Must choose a delivery date". "Must choose a delivery time frame". "Must choose a payment method". "Invalid card".

VIEW ORDER HISTORY:

Author	
Use case name	View order history
Actors	Registered customer

Prepared by: All members	Approved by: Lê Mộng Thúy

USER ACCOUNT WISHLIST

The diagram illustrates a user account wishlist feature within a liquor store application. The interface is structured as follows:

- Header:** Contains a 'Page 1' button, a URL bar with 'https://www.draw.io', a phone icon, an email icon ('youremail@email.com'), and a sign-in section with 'Sign Up' and 'Log In' buttons.
- Main Navigation:** A horizontal menu with 'Liquor Store', 'Home', 'About', 'Products' (with a dropdown arrow), 'Blog', 'Contact', a shopping cart icon, and a help icon.
- Sidebar:** A vertical menu under the 'Products' header with options: 'Cart', 'Checkout', and 'User Account'.
- Content Area:** A large orange-shaded area containing a blue header labeled 'Account Info'.
- User Profile Section:** A blue box labeled 'Profile' with a user icon, followed by four buttons: 'Profile', 'Order History', 'Wishlist', and 'Change Password'.
- Text Section:** A 'Text' label above a table with two rows. The table has columns for 'Item Feature' (Image placeholder), 'Description' (Text placeholder), 'Price' (Text placeholder), 'Availability' (Text placeholder), and 'Action' (a shopping cart icon with a red 'X').
- Footer:** Labeled 'FOOTER' and contains five links: 'LIQUOR STORE' (Text), 'My Accounts' (Text), 'Information' (Text), 'Quick Link' (Text), and 'Have a Questions?' (Text).

The screenshot shows the Liquor Store website homepage. At the top, there's a navigation bar with links for Home, About, Products, Blog, Contact, and a sign-up/login area. Below the navigation is a banner featuring a vase of yellow roses. The main content area has several sections:

- SEARCH BAR:** A search input field labeled "Type a keyword and hit enter".
- PRODUCT TYPES:** A sidebar with a list of product types: Brandy, Gin, Rum, Tequila, Vodka, Whiskey, Cognac, Sangria, Chardonnay, and Sangria Blanc. Arrows point from the "Gin" and "Brandy" items to the respective sections in the main content.
- PRODUCT FEATURED:** A section showing featured products like Jim Beam White Bourbon, The Macallan Terra Highland Single Malt Scotch, and Hennessy VSOP Privilege Cognac.
- PRICE RANGE:** A section for filtering products by price range, with a slider set between \$0.00 and 1000.00. Arrows point from the "Price Range" filter to the corresponding section in the main content.
- PRODUCT LIST:** A grid of product cards. One card for Hennessy XO mit Taschenflaschmann 0.7 Liter 40% Vol. is highlighted with a red border. Arrows point from the "Product List" section to the main content.
- TOP VIEW PRODUCT:** A section showing top-view products like The Macallan Terra Highland Single Malt Scotch, Chivas Regal 12 Year Old Blended Scotch Whisky, and Hennessy VSOP Privilege Cognac.

At the bottom of the page, there's a footer with links for My Account, Information, Quick Link, and a contact form. The footer also includes social media icons for Twitter, Facebook, and Instagram.

Description Manufacturer Reviews

The Macallan Terra is part of the Speyside-based Distiller's Choice® Basill Quest Collection range launched in late 2017. This particular expression is drawn from first-fill sherry seasoned oak casks, with the casks made of European and American oak sourced from two respected family cooperages.

FORGET PASSWORD

The screenshot shows a 'Forget Password' form overlaid on a website. The form has a white background with a red 'X' button at the top right. It contains the title 'Forget Password' in bold black font, an input field labeled 'E-Mail Address', and a red button labeled 'Reset Password'. Below the form, there's a 'Shipping Contact Info' section with fields for 'Full Name' and 'Enter Shipping Recipient'. Two blue callout boxes with orange outlines point to the 'E-Mail Address' input field and the 'Reset Password' button.
